SUMMARY

I am a 4th year BSc.(Hons) Information Technology student at SLIIT with a strong interest in Business Analysis and data-driven problem solving. I aim to bridge business needs with efficient IT solutions by eliciting requirements, analyzing processes, and ensuring functional accuracy. I am motivated to gain experience in agile teams, where I can collaborate with stakeholders, support process improvements, and contribute to developing innovative solutions that enhance business performance.

WORK EXPERIENCE

Intern Business Analyst – SLT Digital Labs

Oct 2025 – Present

- **Web Proposal Development:** Conducted comprehensive market research and gap analyses to architect technical web proposals, aligning digital solutions with client business objectives and targets.
- **System Requirements Specifications (SRS):** Facilitated discovery workshops with cross-functional stakeholders to elicit, analyze, and document detailed SRS, ensuring 100% traceability between business needs and technical delivery.
- **Client Quotations:** Synthesized complex project scopes into accurate financial quotations, leveraging historical data and resource estimation to maintain competitive pricing while protecting profit margins.

PROJECTS

Apparel Manufacturing Management System- Delivery

This full-stack solution leverages a React, Node.js, and MongoDB architecture to centralize apparel production, integrating specialized modules for Delivery management.

LANDORA-Property Management System

Developed a robust MERN-stack platform designed to bridge the gap between landowners and buyers through centralized modules for user authentication and dynamic property listings.
