- English
- Sinhala

SUMMARY:

IT undergraduate pursuing dual degrees at SLIIT and University of Moratuwa, with hands-on Business Analysis experience at SLT Digital Labs. Skilled in SRS documentation, stakeholder workshops, web proposal development, and MERN-stack projects. Passionate about bridging business needs with technical solutions in agile, fast-paced environments.

EXPERIENCE:

INTERN BUSINESS ANALYST — SLT DIGITAL LABS (OCT 2025 – PRESENT)

- Web Proposal Development: Conducted market research and gap analyses across projects to architect technical web proposals, aligning digital solutions with client business objectives and measurable targets.
- System Requirements Specifications (SRS): Facilitated discovery workshops with cross-functional stakeholders per project to elicit, analyze, and document detailed SRS, ensuring 100% traceability between business needs and technical delivery.
- Client Quotations: Synthesized complex project scopes into accurate financial quotations, leveraging historical data and resource estimation to maintain competitive pricing while protecting profit margins.

PAST PROJECTS:

LANDORA — PROPERTY MANAGEMENT SYSTEM(React | Node.js | MongoDB)

- Built a MERN-stack platform connecting landowners and buyers with modules for user authentication and dynamic property listings.
- Designed data flow diagrams and system requirements, translating user needs into clear technical specifications.

APPAREL MANUFACTURING MANAGEMENT SYSTEM — DELIVERY MODULE(React | Node.js | MongoDB)

- Developed a delivery management module to streamline shipment tracking and order fulfillment within a larger apparel production system.
- Collaborated with team members to define user stories and ensure seamless integration with existing manufacturing workflows.
