SUMMARY:

An IT undergraduate pursuing dual degrees at SLIIT and the University of Moratuwa, with hands-on experience as a Business Analyst at SLT Digital Solutions. Delivered SRS documentation and technical web proposals across multiple client projects, translating complex business requirements into measurable digital solutions. Capable in MERN-stack development, UI/UX design, and agile workflows. Passionate about bridging the gap between business strategy and technology to drive meaningful outcomes in fast-paced environments.

EXPERIENCE:

INTERN BUSINESS ANALYST — SLT DIGITAL SOLUTIONS (OCT 2025 – MAY 2026)

- Assisted with web proposal development by supporting market research and gap analysis activities, contributing to the creation of technical web proposals aligned with client business objectives and project requirements.
- Assisted with System Requirements Specification (SRS) documentation by participating in stakeholder discussions, gathering requirements, and helping document functional and non-functional requirements to support project delivery.
- Assisted with client quotation preparation by supporting scope analysis, resource estimation, and cost calculations to help develop accurate and competitive project quotations.

PAST PROJECTS:

LANDORA — PROPERTY MANAGEMENT SYSTEM(REACT | NODE.JS | MONGODB)

- Built a MERN-stack platform connecting landowners and buyers with modules for user authentication and dynamic property listings.
- Designed data flow diagrams and system requirements, translating user needs into clear technical specifications.

APPAREL MANUFACTURING MANAGEMENT SYSTEM — DELIVERY MODULE(REACT | NODE.JS | MONGODB)

- Developed a delivery management module to streamline shipment tracking and order fulfillment within a larger apparel production system.
- Collaborated with team members to define user stories and ensure seamless integration with existing manufacturing workflows.
